### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: The specific limitation(s) of "...a rigid second member, so as to advance, in a direction opposite said first direction, said rigid member to an advanced position, such that when said rigid second member is advanced, said top contact end is restricted from occupying a location which would be otherwise capable of being occupied, by said top contact end, had said rigid second member remained in a non-advanced position..." are not anticipated or made obvious by the prior art of record in the examiner's opinion. For example, Oathout, Leady, and Weiser teach adjustable sound game calls with a rigid member for adjusting the sound...However, the prior art fails to teach "...a rigid second member, so as to advance, in a direction opposite said first direction, said rigid member to an advanced position, such that when said rigid second member is advanced, said top contact end is restricted from occupying a location which would be otherwise capable of being occupied, by said top contact end, had said rigid second member remained in a non-advanced position..."

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
